

CSS – BORDER COLOR

- 💧 The **border-color** property is used in **CSS** to choose the color for the border.
- 💧 Its value should either be a color name, a hex color, or an RGB value.

Sample Code:

```
<html>
  <head>
  </head>
  <body>
    <p style="border-width: thin; border-style: solid; border-color:
red">
      Welcome To WikiTechy.com
    </p> <br />
    <p style="border-width: thick; border-style: dashed; border-color:
#009900">
      Where You Can Learn All The Technologies.
    </p> <br />
    <p style="border-width: 5px; border-style: dotted; border-color:
rgb(13,33,232)">
      Best E-Learning Website in The World.
    </p> </body> </html>
```

Code Explanation:

```
<!DOCTYPE html>
<html>
  <head>
  </head>
  <body>

    <p style="border-width:thin; border-style:solid;
border-color:red"> ← 1

      Welcome To WikiTechy.com
    </p><br />

    <p style="border-width:thick; border-style:dashed;
border-color:#009900"> ← 2

      Where You Can Learn All The Technologies.
    </p><br />

    <p style="border-width:5px;border-style:dotted;
border-color:rgb(13,33,232)"> ← 3

      Best E-Learning Website in The World.
    </p>

  </body>
</html>
```

- 1** In CSS, **border-color: red** is used for applying red color for the border around **p tag**.
- 2** Here, we are Applying hexadecimal color values for border in **border-color** property.

- Note: RGB values can also be assigned using **hexadecimal** color values in the form of: **#RRGGBB**, where **RR (red)**, **GG (green)** and **BB (blue)** are hexadecimal values between 00 and FF (same as decimal 0-255).

- Here, **p element** was defined for the statement **"Best E-Learning Website in the World"** where the border for the statement is applied with RGB Colors values which specify its color values based on the formula (red, green, and blue).

Output:

- Here red color value is applied for the border around the text **"Welcome To WikiTechy.com"** shown in solid border.
- The Text **"Where You Can Learn All the Technologies Easily"** will have a dashed border in green color border which is specified in Hexadecimal.

-
- 3** Over here, the RGB color values is applied for the text “**Best E-Learning Website in the World.**” which will be displayed with blue color with dotted border.
