Program Execution in Java

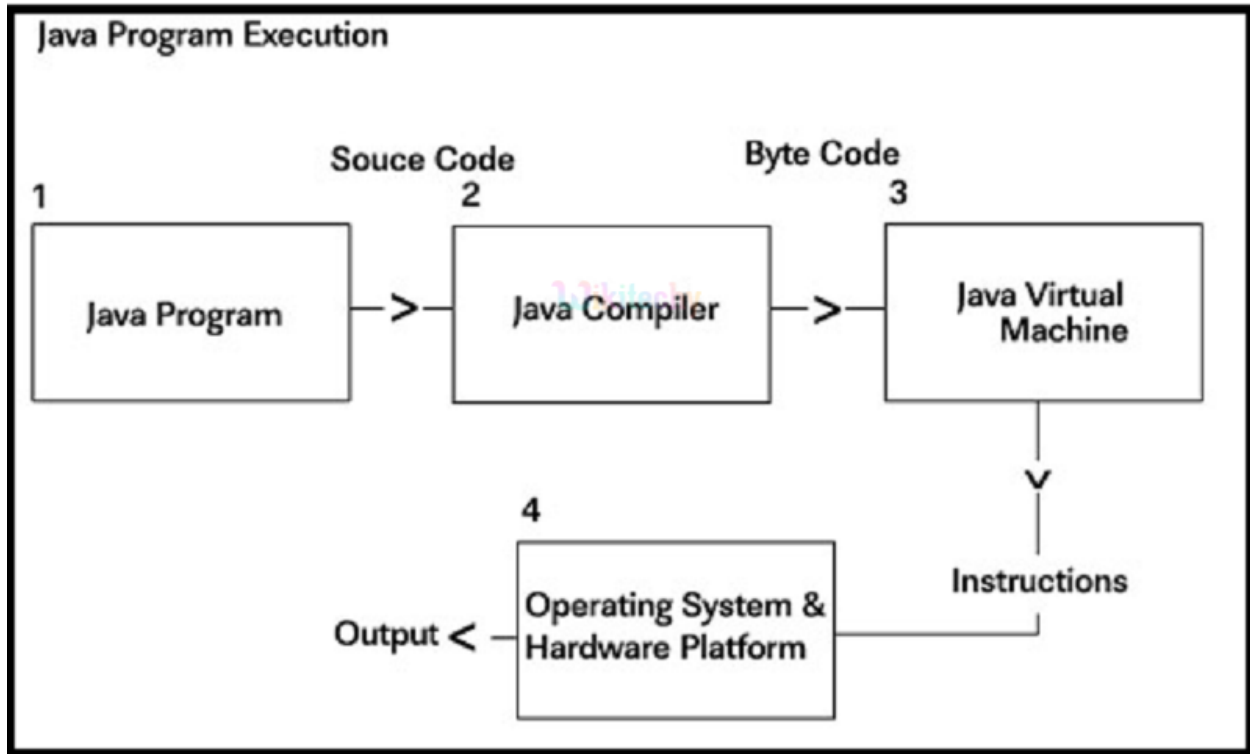

Fig2. Program Execution in Java

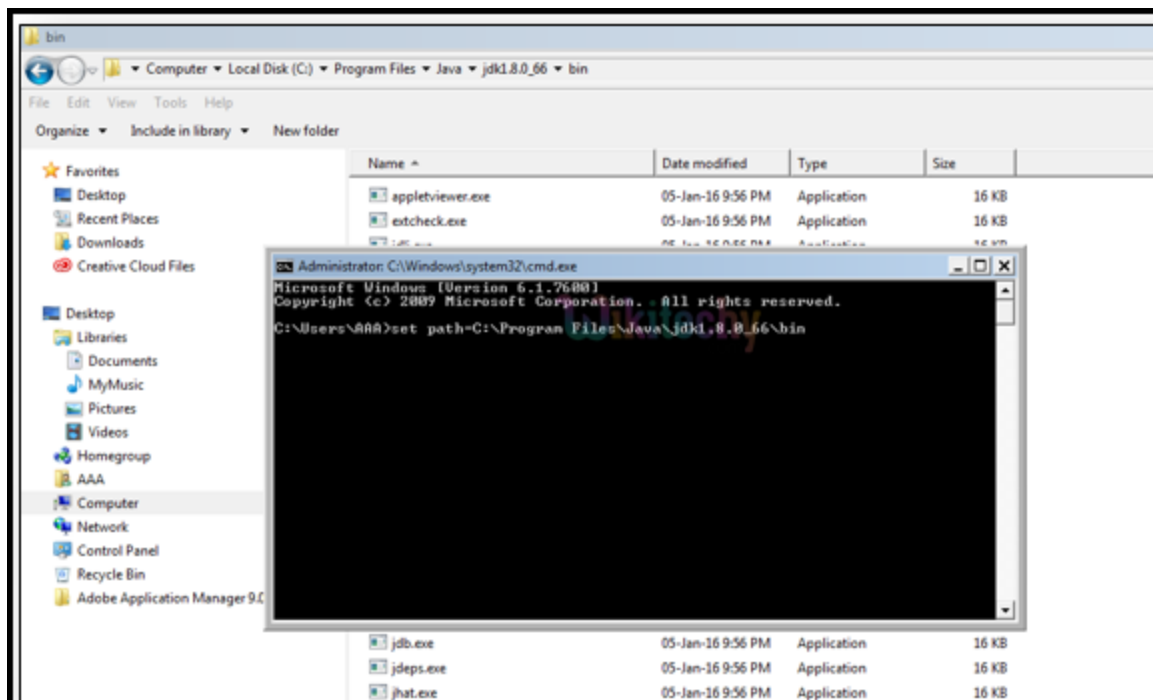

✦ Install Java JDK using the below link:

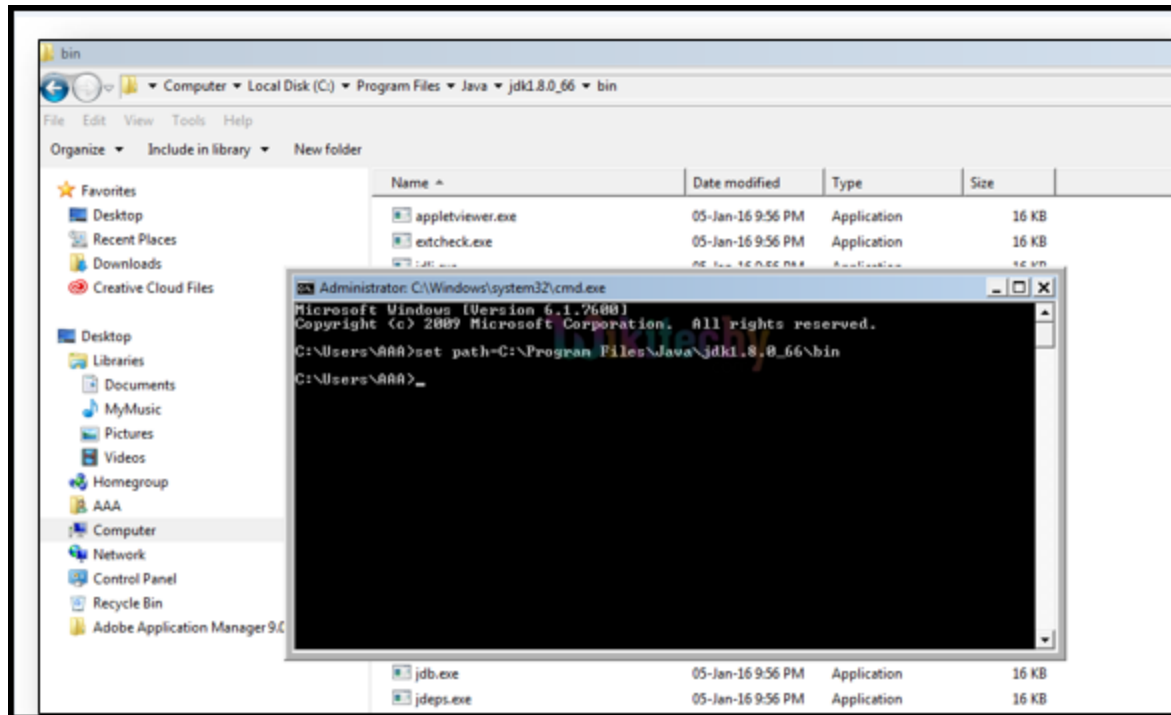

<http://www.oracle.com/technetwork/java/javase/downloads/index.html>

Set Environment Variable Path:

1. After successful installation, go to the folder where the **JDK -> bin** is installed. Usually it is in **C:\Program Files**.
2. Go to bin folder and copy the path. Assume it to be as **"C:\Program Files\Java\jdk1.8.0_66\bin"**.
3. Go to windows command prompt by clicking Windows **Start button** -> **Type "cmd" in Run prompt**. Start Command Prompt by right clicking and choosing **"Run as Administrator"** option.
4. Set path for **JDK** libraries in command prompt as

```
set path = C:\Program Files\Java\jdk1.8.0_66\bin
```

5. Now path for **JDK** is set in your computer. You can start a notepad and type **java programs** and **execute** them using windows **command prompt**.
