

HTML – Comments

- The comment tag is used to insert the comments in source code. The browsers are not displaying the comments.
- To explain the code we can use comments tag.
- If we have a lot of coding lines the comment tag is used.

Syntax for comments in HTML

```
<!--...-->
```

Sample coding for comment tag:

```
<!DOCTYPE html>  
<html>  
  <body>  
    <!--This is the comment tag-->  
    <h1>This is a heading tags to display a header</h1>  
    <!--Comments are not displayed in the browser-->  
  </body>  
</html>
```

Code Explanation for comment tag:

```
<!DOCTYPE html>
<html>
  <body>
    <!--This is the comment tag-->
    <h1>This is a heading tags to display a header</h1>
    <!--Comments are not displayed in the browser-->
  </body>
</html>
```

1. The comment is highlighted and it is hidden. The comment tag is not displayed in the Browser.

Browser Support for comment tag:

Browser	Language attribute
Chrome	Yes
Internet explorer / Edge	Yes
Firefox	Yes
Safari	Yes
Opera	Yes

Tips and notes:

- If you hide the scripts from browsers without support for scripts using the comment tag.
- The comment tag is used for large code program.
- Now the JavaScript is also executing the -->tag. In previous, using two forward slashes (//) at the end of the comment line.
